Personal Projects

Chat Room Web-Application

GITHUB.COM/GUSTASJANUSAUSKAS/CHATROOM-SITE

- Created a modern chat room website using NodeJS, Angular, Websockets and PostgreSQL.
- Implemented efficient room and account systems, with search and favourites functionality.
- Assembled Jasmine/Karma unit tests for most used functions.
- Features file and image sharing, support for direct image and youtube video links.

Social Media Web-Application

GITHUB.COM/GUSTASJANUSAUSKAS/SOCIAL-MEDIA-SITE

- Created a responsive and fully-featured social media webapp with NodeJS, Angular and PostgreSQL.
- Implemented a secure account, user profile and friend system, as well as an efficient search system.
- Filled the website with example accounts, generated using a custom made .NET app powered by machine learning.
- Features a data-efficient personal message system, created using websockets.

Portfolio Website

GUSTASJANUSAUSKAS.COM

- Created a sleek and modern portfolio site using Angular and Bootstrap.
- Site dynamically changes personal project list, using an easily human-readable and modifiable data file.
- Mobile-first, responsive design.
